Keep calm and carry on

A Little Spark

The Freshwater Collaborative of Wisconsin (FCW) “could be the biggest thing we have done as a university,” said

What’s your water resolution? Maybe it’s to be more mindful of how you use this precious resource on a daily basis, or to offer thanks to the lakes or rivers that have special meaning for you.

On a recent late summer morning, something unexpected happened — something amazing — changed up our routine. I’d just

“Green Bay is the largest freshwater estuary in the world and it hasn’t been re-opened to use for recreation and other activities.

Tyner saw multiple possibilities for the Green Bay project, such as deploying technologically advanced NERR in the system.

Thompson during his State of the University Address on Aug. 20. FCW is one of ten projects Thompson listed as key to the system’s future.

The Freshwater Collaborative is going to establish the nation’s most significant, and potentially most influential, example of an estuarine research reserve and education center for the world to see,” Thompson said.

“Green Bay is the largest freshwater estuary in the world and it hasn’t been re-opened to use for recreation and other activities,” said

Associate Professor, Department of Biological Sciences at UW-Green Bay

“In 2019, a student suggested invertebrate zoology Orlofske post some of the photos she

Top among her priorities: coordinating the effort to designate Green Bay as a National Estuarine Research Reserve (NERR). NERRs are a network of nearly 30

“I think of the landscapes, the shorelines of Lake Michigan, the Great Lakes, the Great Lakes. And the landscapes and shorelines are different. And it’s important to have the same kind of projects,” she said.
