

NEW SUMMER COURSE!

Human Interactions with Lake Michigan Coastal Ecosystems, May 28–June 24

How has Wisconsin's freshwater coast been impacted by climate change, wastewater runoff, agricultural runoff and coastal erosion? Dive deep with faculty from three universities. No prerequisites. 3 credits.

In-person field work: June 3-14.
Online: May 28-31 and June 17-22.

Open to any student enrolled at any UW System campus. Lodging and all meals provided.

Spaces are limited! Interested students must apply and be accepted to enroll.
