

Summer 2025 Paid Internship

The Red Cedar Basin Monitoring Group at UW-Stout is looking to hire two student interns for the summer 2025 field season. The RCBMG is led by faculty and staff in the UW-Stout Biology Department focusing on the sources of and solutions to surface water problems in the impaired Red Cedar watershed. Student interns will have the opportunity to work on a variety of projects focusing on:

- Nutrient pollution and harmful toxins in lakes
- Stream restoration impacts on water quality and macroinvertebrate communities
- Wetland/riparian vegetation dynamics and hydrology
- Spatial patterns of land use and water quality

Compensation and benefits

Interns receive a salary of \$5,200 and scholarship funding to enroll in UWEC's Advanced Freshwater Experience course. You may also potentially earn internship credits for your experience.

Required Qualifications

- Pursuing a bachelor's degree in a life or physical science at UW-Stout, UW-Oshkosh, UW-River Falls, or UW-Eau Claire
- Valid driver's license and transportation (mileage reimbursement available for research travel)
- Ability to work in a variety of conditions in the field with a positive attitude

Desired Qualifications

- Experience with common GIS applications
- Willingness to obtain a Wisconsin boater license
- Experience collecting environmental data including water sampling and laboratory analysis, vegetation sampling, insect sampling, or others
- Familiarity with the ecosystems of the Upper Midwest

Apply by sending a resume and cover letter to Nicole Hayes, Assistant Professor, hayesn@uwstout.edu with the subject heading "2025 FCW summer internship_your name"

For full consideration submit your candidate materials by Jan. 19th at 5 pm.
